Does it work on MorphOS?

It does.

Quote:

If it works at least one of the exec V45+ functions in broken in the MorphOS exec, in this special version I've changed the (SysBase->LibNode.lib_Version >= 45) tests to (SysBase->LibNode.lib_Version >= 45 && !FindResident("MorphOS")).

I think MorphOS exec functions beyond V40 names are not compatible to V45 exec functions.
