URL:

@Capehill

Downloaded SDL2 and copied again where it should:

```
#version SDK:Local/newlib/lib/libSDL2.so file
```

```
VERSION: Sin información de versión para "SDK:Local/newlib/lib/libSDL2.so".
```

```
#
```

So no version tag inside .so

Doing:

```
nm SDK:Local/newlib/lib/libSDL2.so >ram:sdl2_symb
```

and searching for "SDL_GameControllerTypeForIndex" and "SDL_JoystickGetDevicePlayerIndex" shows nothing found
