@Paul

I had the same yesterday as soon as i gave the Machine a Name i had no Network connection. Was trying to get smb up and running and have the machine show up with a name. As far as i know you leave everything at default.

```
# DEVS:NetInterfaces/PPC460EX_ETH
# File generated by Internet 53.3 (1.8.2011)
# On Saturday, 04-Jul-20 at 12:57:30
device=ppc460ex_eth.device
hardwaretype=Ethernet
configure=dhcp
```

give it a try
