atx power supplies are problematic when you try to run them with Amiga. That is why I have made extensive research before getting myself an ATX psu for my A4000T.

The one I use is this:

<https://www.amazon.com/Seasonic-SS-520...inum-ATX12V/dp/B009VV56TO>

This is the best power supply for low ripples on the 12v rail.
