Hi,

I apologize, if I always ask for advice but I always try to improve.

I have reached a good configuration, and I try to find the best settings.

I've seen this video working on an X5000

At 2:01 he manages to bring the video behind the workbench with emotion player.

How you can get it would help me a lot.

It seems to me that you do not use Dopus or I am wrong.

here the video of the X5000

<https://www.youtube.com/watch?v=cqMlrCIXN0A>

here instead my results obtained, I would very much like to continue improving. Thank you
