Sigh 😞

I uploaded a new version of ScummVM (while tired) and forgot to update the version.

[http://www.os4depot.net/?function=sho ... ame/adventure/scummvm.lha](http://www.os4depot.net/?function=show_item&id=12345)

Please someone change the version to 2.2.0 or AimUpdate will not pick it up (or so i think)

Thank you
