URL:

OK, I prepared this for months and I think I can finally show you the result 🤗 The [Rear Window](#) blog will follow my Amiga projects as well as provide writing space for whatever my Amiga user- and developer experience may bring. I've recently taken part in a demo-production and used my X5000 to make the music, so you can read about that for starters.

On OS4, I recommend using the Odyssey browser to view the blog. Enjoy!
