@joerg

Thanks for the continued development of SFS. :)

I've just had a look at the complete 1.273 archive and have a few questions regarding the following tools:

SFSconfig

SFSdefrag

SFSobject

SFSquery

There are two copies of the above programs in the archive. One set in the "Smartfilesystem" directory and more in the "Smartfilesystem/AmigaOS3.x" directory.

Which are the correct to use? It's left me a little confused as they have different creation dates and file sizes.
