I want to open on the boot necessary wb window in the path I need, do we have for that some default tool coming with OS, or maybe some workbench prefs somewhere?

I.e. something like "wbopendir work:aaa/bbb" and it will open me "bbb" directory.

Thanks

EDIT: Find out that: [http://os4depot.net/?function=showfil ... =utility/shell/wbopen.lha](http://os4depot.net/?function=showfil...=utility/shell/wbopen.lha)
