@amigakit I don't think that anyone waits your to do a "lot" or a start weekly report etc. Just few words time to time. Waiting A1222 has been very silent process. :(

I agree with this. Somewhat between two weeks or a monthly report would be more than sufficient.

@amigakit

I noticed the "Info window" displaying the agreement during the installation of the EnhancerCore, allows text to be selected (I was trying to select the e-mail address to send a report), but it can not be copied: "RAmiga-C" activates the "Cancel" button below the text area.

This might very well be an issue with ReAction as a whole, (RAWBInfo is another example) but Shortcut keypresses should be filtered from the such combined with a meta key (at least RAmiga and LAmiga). System-wide. At the moment, I can not think of an exception where it would make sense not to.
