I noticed the "Info window" displaying the agreement during the installation of the EnhancerCore, allows text to be selected (I was trying to select the e-mail address to send a report), but it can not be copied: "RAmiga-C" activates the "Cancel" button below the text area.

This might as well be an issue at the infowindow.class level. I'll look into it ASAP.

EDIT:

The Cancel button is triggered because it has the "C" key set as a keyboard shortcut. This functionality is provided by the button.gadget, which triggers the shortcut even if the key is pressed together with an Amiga key (but not Alt or Ctrl). So it looks like a button.gadget bug to me...

EDIT2:

Or maybe it's window.class that handles the button shortcuts? Don't know.
