V2 of what? Of RadeonHD? Of ESP? You see how all this is not clear?

The RadeonHD driver.

Quote:

Yuv support is not was shown in A1222 video, we have had yuv support for a where long time (2015), what was shown in A1222 presentation was hardware decompression, so they releasing something they already have released.

I made no reference to the video showing hardware decoding on the A1222.

At the bottom of the wiki page I linked to.
