Enhancer Software Graphics Upgrade on AMIStore

<https://amigaworld.net/modules/news/article.php?storyid=8282>

I learned reading your link that "Enhancer Software version 1.x required". What I missed reading its description in AMIStore. And with which variant(s)?

Anyway, another thing that's not logical to me is "Everyone that orders this package will receive a licence for the forthcoming Enhancer Software 2 release". The graphics drivers and libraries can be acquired with the Enhancer Software Graphics Upgrade, that can be seen as a subset of the Enhancer Pack ... that will allow a future update of the pack in which it is contained.

I understood the difference between the content of the 3 flavours of the Enhancer Packs. I just think there are too many variants. And the "Core" version in addition to that!

And about the terminology, I never know if the Special pack is better or cheaper than the Standard pack, if I don't read their description.

My comments and suggestions were not restricted to these Enhancer Packs.

Note: OMG! Your answer made me looking again at the Enhancer Packs content and I just understand that "Warp3DN_SI.library" is Warp3D Nova! My first idea was to buy Warp3D for Radeon SI and thought I will get it with the Enhancer pack! That's not new but reusing the term Warp3D brought confusion.
