Maybe you need to put those definitions:

```
extern struct Library *AslBase;
```

```
extern struct AslIFace *IASl;
```

on top of amigaos-dialogs.cpp, before includes.

BTW I forget to "NULLify" ASL variables at end:

```
Exec->DropInterface((struct Interface*)IASl);
```

```
IASl = NULL;
```

```
IExec->CloseLibrary(AslBase);
```

```
AslBase = NULL;
```
