@Raziel

You need to add IFace:

```
struct CodesetsIFace *ICodesets = NULL;
```

...

```
ICodesets = GetInterface((struct Library *) (Codesetbase), "main", 1L, NULL);
```

and close at exit/end:

```
DropInterface( (struct Interface *) ICodesets );
```

```
ICodesets = NULL;
```

...

Are those missing functions part of MorphOS/OtherOS?

Or part of your port/sources?

If part of MorphOS, check MorphOS sdk autodocs and see such functions and then try to amigaos4'ize thrm.

EDIT: seems theyu a part of MorphOS charset autodoc:

```
charsets.library/ConvertTagList()
```

```
charsets.library/GetByteSize()
```

Yo can try to adapt parts in convert.c example (codesets archive) and replace in your port/sources.
