@Raziel

I think the missing ICodesets will shown only on linking stage.

codesets has somethiong like "ConvertTagList":

```
char *destbuf = CodesetsConvertStr(  
CSA_SourceCodeset, srcCodeset,  
CSA_DestCodeset, destCodeset,  
CSA_Source, buf,  
CSA_DestLenPtr, &destlen,  
TAG_DONE);
```

You just need to "fill the gaps/variables" (convert.c example)
