not the core but I purchased the plus edition years ago for my X-5000, that was updated as the updates were released (up to v1.5) but I dont see any toolbar.gadget in classes/gadgets either in SYS: or in the archive of v1.5 (support or installation files).

EDIT: it is also not in v1.4 which seems to be the earliest version I got so how to I get the older package so that this gadget gets installed (and hopefully updated) ?

EDIT2: ok got it ! I did not know you can download (and install) without having a prior version installed.
