I also enabled the download of Toolbar Gadget for Enhancer Software v1.x users - so even if you own the Plus, Standard, Special or Core versions the gadget will download for you on Updater.

I did not have immediate plans to release a Version 1.6 of the Enhancer Software because we want to migrate to v2.0 shortly. However I *may* consider it as a maintenance pack to bring v1.x in line with the Core Edition. I am undecided at the moment and it would depend on demand from users. In the interim every v1.x customer can download the gadgets found in Core without needing to register for Core.
