Rechecked all the shaders which give me errors about "no matching overloaded function found", and for the "min", "max" and "round" they are gone. Through found one shader, which still brings error about "rot":

<https://www.shadertoy.com/view/3dVyD3>

But that one IMHO not worth worry, as it just one single shader from thousands tested.

Another also not that big of worry issue, is I found that for some heavy shaders I have such a warning:

Warning : 40:1: 'preprocessor evaluation': undefined macro in expression not allowed in es profile
HW_PERFORMANCE:

That one harmless, things works after it show ups, but still maybe worth to look at. There is test ones with this warning:

<https://www.shadertoy.com/view/tt2XzG>
