you can buy converters, depending on what connection you can spare to turn into a PCI-E 8 pin.

[6-Pin PCIe to 8-Pin PCIe Adapter](#)

[15-Pin SATA Male to 8-Pin](#)

[8-Pin PCIe to Molex \(2x\) Power Cable](#) - be aware that you need 2 free molex connectors for this to work

These are examples so that you can buy from your preferred site.
