The latest gcc we have available (as beta) is 8.4.0 ([https://dl.bintray.com/sba1/adtools-na ...ls-os4-8-20200408-704.lha](https://dl.bintray.com/sba1/adtools-na...ls-os4-8-20200408-704.lha))

But i don't know if anyone is using that already (I didn't even know that there was a new version, i still use 8.3.0)
