its the pci-1 that is excluded if using onboard sata.. but you shouldn't be using onboard sata. instead get a sata card like Silicon Image Sil3114 SATA controller (PCI)

[https://www.amiga-shop.net/en/Amiga-Ha ... ntroller-4-Port::474.html](https://www.amiga-shop.net/en/Amiga-Hardware-4-Port-474.html)

and get Envy24HT audio card (PCI-1x)

[https://www.amiga-shop.net/en/Amiga-Ha ... -VT1723-Envy24D::770.html](https://www.amiga-shop.net/en/Amiga-Hardware-VT1723-Envy24D-770.html)

is what im using.. this for me is very stable with no fuzz

why not using onboard sound? because it is shit quality and Envy24HT is 100 times better
