OK, adapter has arrived. Faster then I expected.

But it's based on PEX8111. It was advertised as PEX8112 😞

Hans mentioned it should work too but it was long time ago and Max mentioned only PEX8112 and PI7C9X, lately. Will it work?

If I plug in, a borrowed HD7750, it should show an UBoot screen, right? I don't have a RadeonHD driver yet.
