New Sam460cr boards will hit the road soon!

ACube Systems is happy to see a new update for AmigaOS and MorphOS. We would like to make a small party with Amiga users in these difficult times.

We then decided to make a small gift to the Amiga and MorphOS Community.

To celebrate the recent release of AmigaOS 4.1 FE Update 2 and MorphOS 3.14, we built a small batch of Sam460cr boards that will be available with a Christmas bundle of the following games:

Gorky17

Descent Freespace

The Secret of Middle City

BOH

The whole bundle will be at 489 Euros.

OS 4.1 FE is included in this product.

We will be ready for shipping in january 2021.

We are also preparing a new shop that will be up to the standards.

Available soon so stay tuned!
