I will get one for sure even if I had pegasos2 and x5000. And for testing purposes, and for the sake of dying on my peg2 or x5000 :)

The question is : that will be a version with 1.1ghz CPU or with 1ghz? Also how many of them? I sure there demand while there no Tabor. Will be there at least 500 motherboards?

And basically, how can we hold one to be sure we got one ?:)
