I honestly think that people who already own an AmigaOS 4.1 system should not buy one of these new Sam460cr.

It'd be better to let those that have been waiting for months (years?) to get an entry level system to discover the AmigaOS 4.1 world to be able to finally buy one.

I don't think there will be 500 Sam460cr tyo be sold (not even 100). It would be too costly to produce for ACube.

What AmigaOS 4.1 needs is more users, not few people owning lots of different OS4 hardware.
