I completely agree with Trixie's comments. If you already own it, you can use it a bit now. If you don't, there's no sense in wasting your money on a buggy alpha version of a program with no customer support, and likely no fixes in the future. It's just the sad situation that Deron has created (or, at least, has not shown any interest in fixing).

I really wish he would allow someone else to take over the Amiga version. We could use a powerful DTP app on OS4.
