Well, I guess whatever the reason was it was probably wrong.. 😞

Of course as long as that new prefs are so unstable that they cannot be included yet
But having that notification in blue by default and can not be change it..

@trixie

Ok, so maybe another reason to wait a bit before reinstalling the Update 2 .. 😞

Actually i'm fighting with my miggy for other unrelated issues i've being investigated... i'm in fear my Sam440 is
deciding to retire 😞
