Check my last edit in previous post as well : i found there some simple test case for threading/semaphores, so not involving game's code : https://github.com/minetest/minetest/blob/master/src/server/test/test_threading.cpp

And it also brings me such an error. So it definitely threading/semaphores issue by itself.

Will try to rebuild that test as standalone, so we can then step by step reduce things and find out the bastard
