The Enhancer Software Core V1.1 requires 4.1 update 6 as minimum according to the readme. But that is clearly not the case.

I'm afraid you're right. Originally, Update 6 was indeed agreed on as the minimum requirement for the Enhancer, but that was years ago. Since then many people have joined the Amiga Developer team and have produced new Enhancer stuff. It's quite possible that, in the meantime, the Final Edition has silently become understood as the minimum common denominator. Which, by the way, makes every sense because Update 6 is really ancient, the Final Edition (especially after Update 1) is much better, and its price is in no way prohibitive.

So I guess we just need to change the readme 😞
