Thanks for your reply. I just wanted to be sure that you had that as well, and that's not a problem of my setup. In my case, though, they are counted as errors and not warnings.

Also, do you plan to compile it against latest MUI?

Update:

I did a few changes that remove those issues, although I am not sure yet for the impact:

line 202 at /odyssey-r155188-1.23/Source/WebKit/OrigynWebBrowser/Api/MorphOS/mui.h

change to

```
while ((tag = NextTagItem(&_tags))) switch ((long unsigned int)tag->ti_Tag)
```

line 120 at /odyssey-r155188-1.23/Source/WebKit/OrigynWebBrowser/Api/MorphOS/classes.h

change to

```
MA_dummy = (long unsigned int)(MTAGBASE),
```

line 202 at /odyssey-r155188-1.23/Source/WebKit/OrigynWebBrowser/Api/MorphOS/mui.h

change to

```
while ((tag = NextTagItem(&_tags))) switch ((long unsigned int)tag->ti_Tag)
```

With the above changes I managed to compile Odyssey just fine, and seems to work so far I tested them. But as I said, as I am not that familiar with the code, those changes need your review.
