just a silly question.. now that my system is updated and tested, everything seems great, no issues. yet lol.. so, i want to try get the understanding of warp3d Nova & GL4ES.. get it correctly installed.

i have installed update2+fix

(via amistore) Enhancer Software Plus Edition, Warp3d, Radeon 2.1

and spencer game.

my setup is X1000 Radeon 7970 DirectCUIII 3GB

and i still need some software that i need to get somewhere else, like GL4ES2..

where is the correct way to fetch them needed files?

found MiniGL4GL4ES on os4depot, but is not i need right now for spencer test number one?

thanks for helping
