Perhaps Raziel could try -Os to optimize for size.

Quote:

-Os

Optimize for size. -Os enables all -O2 optimizations except those that often increase code size:

-falign-functions -falign-jumps

-falign-labels -falign-loops

-fprefetch-loop-arrays -freorder-blocks-algorithm=stc

It also enables -finline-functions, causes the compiler to tune for code size rather than execution speed, and performs further optimizations designed to reduce code size.
