They (Hyperion) were actually showing it at Amiga34, it took some time to start (running on Pegasos2), but I was able to write some text lines of formatted text... (took some pictures as a proof too ;)

As I'm able to run office.com (Wayfarer on MorphOS), I would say that the speed under Wayfarer (G5 Mac) vs. LibreOffice (Peg2) is way slower... so I surely hope they'll find some resources to finalize the work with the LibreOffice.
