@kas1e and @raziel

I appreciate your encouraging words. I realize that what I wrote came across as frustration, but it really shouldn't be interpreted that way. I'm still motivated. It's just that there needs to be a bit of planning involved if you want to last a full marathon. If you start having pain after just 20km then you need to slow down, it's supposed to start at 35km, not before that 😊
