Back in times: yes. But after him land diffs to adtools repo, Sebastian do some changes on as well.

The only gdb I can find there is this: <https://github.com/adtools/amigaos-gdb-4.18>

It's the patches below that are used for the gdb in the SDK I guess?

[http://os4depot.net/?function=showfil ... t/debug/gdb-5.3.patch.bz2](http://os4depot.net/?function=showfil...t/debug/gdb-5.3.patch.bz2)

Or are there even newer ones?

I.e. break can be set, listing works, it just TRAP seems broken ?

To me it's like trying to determine if the oven is on when the house is on fire 😊
