Test this one:

WHEN website = "Youtube" THEN address command 'C:Python Work:aistreams/youtube.py -shh -u ' url
' -q 22'

Don't put extra space in file path, only for options. You can adjust quality option (-q option) by changing the number (22 means 720p).

Found this on the net

171	webm	audio only	DASH audio	115k	, audio@128k (44100Hz), 2.59MiB (worst)
140	m4a	audio only	DASH audio	129k	, audio@128k (44100Hz), 3.02MiB
141	m4a	audio only	DASH audio	255k	, audio@256k (44100Hz), 5.99MiB
160	mp4	256x144	DASH video	111k	, 12fps, video only, 2.56MiB
247	webm	1280x720	DASH video	1807k	, 1fps, video only, 23.48MiB
136	mp4	1280x720	DASH video	2236k	, 24fps, video only, 27.73MiB
248	webm	1920x1080	DASH video	3993k	, 1fps, video only, 42.04MiB
137	mp4	1920x1080	DASH video	4141k	, 24fps, video only, 60.28MiB
43	webm	640x360			
18	mp4	640x360			
22	mp4	1280x720	(best)
