Btw I tried compiling same source on Sam460 with SDK53.30 installed with gcc 4.2.4:

Is 4.2.4 not capable fo compiling SDL2 stuff ?

```
NTFS-USB1:SDLEXAMPLES> g++ 10_color_keying.cpp -o 10_SDL2 -ISDL2 -SDL2_image -ljpeg -lpng -ltiff
-lwebp -lz -lpthread
