Yes I missed -l with copy-paste, but I also tried with correct command line.

compiling one line example gives out this:

```
7.RAM Disk:> g++ test.c -o test -ISDL2 -ISDL2_image -ljpeg -lpng -ltiff -lwebp -lthread
```

```
assertion "cached == 0" failed: file "../gcc/libc++/line-map.c", line 277
```

```
cc1plus: internal compiler error: Aborted
```

```
Please submit a full bug report,
```

```
with preprocessed source if appropriate.
```

```
See <URL:http://www.sf.net/projects/adtools/> for instructions.
