Did you test your setup using a dual link DVI cable 2 hdmi/displayport ?

Dual link dvi can reach 9.9Gbps vs 4.59 single link.

$3440 \times 1440 @ 30\text{Hz} = 4,46 \text{ Gbps}$

$3440 \times 1440 @ 50\text{Hz} = 7,43 \text{ Gbps}$

$3440 \times 1440 @ 60\text{Hz} = 8,92 \text{ Gbps}$
