Hi Paul

You are a really great guy and I always very much enjoy meeting you every year at Amiwest. I wish the circumstances from this pandemic made meetings and events possible again. I share your passion for this platform and like you I want it to succeed.

I fully respect your viewpoint but I want to continue to strive to give users the best experience they can have. We have different ideas on how to achieve this.

As you maybe guessed, the revenue that is generated from Enhancer Software sales doesn't meet the costs of software development. My personal time and resources are helping to contribute to the development.

However in the face of seemingly endless litigation and events such as "bankruptcies" over the last few years, it is preferable to work on an independent project that is not effected by these disruptive events and instead achieves positive results. Something that can grow and mature and ultimately be safeguarded for this community for the longer term.
