I'm struggling with a new error since this 2.0.14 release.

I'm either getting it on linking the executable or (in the case of the sdl2 static build) right after configure checks for sdl2

```
g++ -lpthread -athread=native -Wl,--export-dynamic -L/sdk/local/newlib/lib -std=gnu++11 -
U__STRICT_ANSI__ -W -Wno-unused-parameter -Wno-empty-body -fno-operator-names -std=c++11 -gstabs -

SDK/local/newlib/lib -ISDL2 -I/SDK/local/newlib/include/SDL2 -D_REENTRANT

```

Any help greatly appreciated
