If you can find plain Radeon HD variants these should work ok.

HD7750 or HD7770. Some newer ones R7-250X or R7-250E moel also work with no problems. But most newer variants are a problem for some reason.

The Radeon RX 550 or RX 560 models will probbaly work close to 100% but with no U-Boot so not good for setting up a fresh system .
