I have been able to reproduce the issue with my sam440 flex + PCI->PCIe adapter. Turned out to be a cache handling difference between the e5500 and ppc440. The issue has been solved and the next version of the driver should also work on a sam460.

To those with a sam440: I've used [this](#) adapter to make a hd audio card work in my sam440 flex.
