Hi spanish translation done (<http://jabirulo.byethost13.com/temp/basiliskII/>).

Cloned your github and building here on my SAM460ex I got a few problems:

1)tweaked a bit makefile to work on my system.

2)missing "#include <stdint.h>" on some AmigaOS4 sources (prefs... video_driver... and a few more)

```
...
#make -f Makefile_amigaos4
-e compiling "obj/main_amiga.o"...
g++ -athread=native -D__USE_INLINE__ -I../include -I../uae_cpu -I. -D__AMIGADATE__=
" `c:date LFORMAT %d.%m.%Y` " -gstabs -funroll-loops -finline-functions -ffast-math -mmultiple -c main_amiga.
cpp -o obj/main_amiga.o
main_amiga.cpp:162:34: error: 'uint32_t' has not been declared
void print_sigs(const char *txt, uint32_t line)
                        ^~~~~~
...
```

3)need to comment "#include <proto/retroMode.h>" on init.cpp

EDIT: updated too GUI a bit (source/changes available on web/url above)
