You only need this file:

<https://github.com/khval/BasiliskII-1. ... gaOS-4/locale/basilisk.ct>

the .cd file is not needed its used make the empty .ct file.

Quote:

I will take a look and see if i can create a dutch version.

The Dutch folder in the github seems to have a .CT file in German.

Well that might be, I can only hear the difference between the languages, I can't read the difference.

Don't worry about replacing it, its outdated copy of translations for MorphOS / MUI version, the reaction GUI is not completely the same.
