The bus speed would be the same as a single lane PCIe is all that can be used with any adapter even if it has a x16 connector . There may be other factors such as prefetch code.

Can anyone comment on the speed (PCI to PCIE x16)* vs (PCI to PCIE x1 to PCIE x16)**? Or it does not matter because of speed of PCI slot?

*adapter with PEX8111/8112

**Startech adapter with PCI1PEX1 plus adapter PCIEx1 to x16
