Seems "size" parameter is missing in source code. Possibly there should be "wid" but that's a guess. However, in the same file there is only one call for that constructor and "0" is passed as size:

<https://github.com/landersson/roketz3d/blob/master/threads.cc#L61>

So Sinan may use a simple workaround by hardcoding the constructor like:

```
ImageData(uint8_t *data, int wid, int id) : _data(data), _size(0 /* was size */, _id(id) { }
```
