I propose you could try something like:

```
jpeg_start_compress(&cinfo, static_cast<boolean>(TRUE));
```

for issues like

Quote:

```
main.cc:361:33: error: invalid conversion from 'int' to 'boolean' [-fpermissive]
361 | jpeg_start_compress(&cinfo, TRUE);
```

PS. these issues have nothing to do with SDL2...so better have a separate thread for each port or one generic "how to compile X" in my opinion :)
