But I have to disappoint you....

Drat! 😞

@Capehill

Quote:

Disable VSYNC because it's enabled by default.

I knew that...and forgot to turn it off 😞

Now, the result is **38/39fps**

Will be also interesting if you can try some of my ports too...

That was the plan but I'm in the middle of a painful process of configuring Basilisk and installing Mac OS8.1. I have lost few hours just to discover that ROM and MacOS are OK but I can't see an initial screen because of the wrong display setting.

CPU is 100% so, I will be able to do more tests maybe in a week or two 😞
